

HINDERMANN PROTECTIVE BICYCLE COVER UNIVERSAL 2

Tailor-made for the particular shape of ready-to-ride wheels.

Universal – For bicycle racks

The protective cover is designed primarily for bike racks mounted on draw bars, but its box shape makes it universally usable, e.g. for scooters on a platform. It is pulled over the bikes from above. Along the lower edge is an incorporated hollow seam for the loosely attached elastic band. The motorhome is equipped with a transparent pocket for the warning sign (warning sign not included).

- up to 2 wheels is also suitable for a small children’s bike on a third track
- The new size XL is designed for 3 adult bikes; see image above.
- The bicycle handlebars do not have to be adjusted.

The illustrated straps are not included. To ensure that the case fits snugly and has a secure hold, we recommend the Hindermann belt system item number 8950-2350 with hooks on both sides for looping through the eyelets of the transparent pocket.

Mounting it on the car is not permitted.

Size	Colour	Article No.
up to 2 bikes	grey	8472-2460
NEW! up to 3 bikes in size XL	grey	8475-2460
up to 2 e-bikes, 214 cm long	grey	8473-2460
