Recommended Usage:

- Position the product approximately 40-50cm away from the tires.
- Start the vehicle, release the brake completely, and avoid pressing the accelerator.
- Drive at a steady pace through the designated area.
- It is recommended to use reverse gear if possible.

Reset switch:

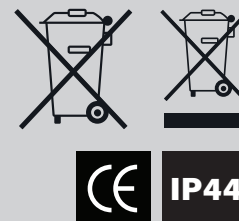

If the display area of the product fails or the power switch function fails, insert the reset-tool into the reset switch hole (07) and press the reset switch, the product will return to the factory state.

Specifications:

Size: 350 x 60 x 30mm
 Weight: 1,28 kg
 Battery Specification: 3,7 V, 600mAh Lithium polymer battery
 Input voltage/current: 5V | 0,6A
 Battery capacity: 15 hours (approximately 60 rounds of use)
 Waterproof grade: IP44

Warning:

1. Don't measure the weight of product over 1500 KG.
2. The control panel must not be compressed by heavy objects.
3. The product should not be immersed in water or be used/stored for long periods of time in a humid environment.
4. When measuring the weight of the object, the accuracy tolerance is 2.5%.
5. Please make sure to use this product on a hard and even surface, and avoid slippery roads.

1-Year Limited Warranty

This product is covered by a 1-year warranty against defects in materials and workmanship under normal use. This warranty does not cover damage caused by misuse, incorrect installation, or normal wear and tear.

If a defect arises, we will repair or replace the product (or its defective part) at our discretion. Proof of purchase is required for all claims. Costs for inspection, delivery, or unapproved third-party work are not covered.
